

Geo-Engineering Reconnaissance of the February 27, 2010 Chile Earthquake

Table of Contents

| | |
|------|---|
| | Acknowledgments and Collaborations |
| | Executive Summary |
| 1.0 | Introduction and Scope of Reconnaissance |
| 2.0 | Engineering Seismology and Earthquake Ground Motions |
| 3.0 | Remote Sensing and Pre/Post Imagery |
| 4.0 | Regional Geology and Coastal Uplift/Subsidence |
| 5.0 | Site Effects and Damage Patterns |
| 6.0 | Liquefaction and Lateral Spreading |
| 7.0 | Effects of Ground Failure on Buildings |
| 8.0 | Effects of Ground Failure on Ports, Harbors and Industrial Facilities |
| 9.0 | Effects of Ground Failure on Bridges, Roads, Railroads and Lifeline Systems |
| 10.0 | Slope Stability and Landslides |
| 11.0 | Dams, Levees, and Mine Tailings Dams |
| 12.0 | Retaining Structures |
| 13.0 | Tsunami Effects |
| 14.0 | Geologic and Tsunami Hazards, Urban Planning, and Reconstruction |
| 15.0 | Characterizations Using Advanced Reconnaissance Tools |
